

Title: Environmental Management System Procedure
Subject: Policy
Created: 08/06/2017
Doc. No.: EMSP-02
Rev. No.: 02

The Møller Centre's Environmental Policy

We are fully committed to minimising the environmental impact of our activities and services by meeting all environmental legislation, and approved codes of practice.

This includes the setting of clear and realistic team objectives and regularly measuring progress to reduce our impact.

We are committed to the protection of the environment, which includes the prevention of pollution and other issues upon which it impacts; we aim to continuously improve our environmental performance through the support and involvement of all employees and any other interested parties.

At the core of this commitment is the implementation and continual improvement of an Environmental Management System (EMS), based on the internationally recognised ISO14001:2015 Standard.

The EMS provides a framework to manage the Centre's focus on the following:

- **Meeting legislation, regulations & Compliance obligations**
- **Efficient Water use**
- **Efficient energy use**
- **Recycling & re-using materials**
- **Sustainable procurement**
- **Responsible Consumption**
- **Educating staff**
- **Communicating to all stakeholders**
- **Green Impact Team**

We are determined and aim to do everything within our control to ensure future generations can benefit from our activities, rather than be hindered by them.
